

# SOCIAL MARKET

## *WordPress*

### **Let's get you connected!**

Having an effective website is a vital part of any growing business! You don't only want to get people to your site and see what your company has to offer... but you want them to become a paying client or customer! And, that's when the investment of an effectively designed website pays off!

What is involved in creating a website? First you need a company or a reason to have a website. If you have that, we're set! I can provide:

- Back-end work (getting your domain name and/or hosting for your site)
- Content configuration, planning and editing.
- A layout intended to keep your visitors on your site longer.
- A design that reflects your company's personality, mission and purpose.
- Maintain consistency with branding
- 3-page website with basic page SEO

Things I may need from you:

- Email address to connect to site
- Links to any social media platforms
- Logo and any branding content already established for your company
- Content and intention for your site's pages
- Ideas or samples of other sites you like

**SPECIAL: \$850**

Once we are done, I will leave you with a working site and a complimentary manual with basic maintenance instructions. Note: The purchase of a domain name, hosting and/or additional expenses are not included in this quote and are the responsibility of the client.
